

Trusted e-Waste Recycling Partner

Founded in 1993, Sogo group caters to the whole product lifecycle from IT assets sales, rental and e-Waste.

Sogo is one of pioneers in e-Waste Management, since 2015 with a Mission to protect data, people, resources and the environment.

We have set up two fully integrated, state-of-the-art processing facilities and branch offices across India.

Corporate Culture

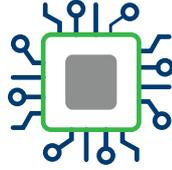

Accountability, Transparency, Trust, Proficiency & Sustainability.

Wide Range of Solutions

IT Asset Inspection

Conduct an onsite assessment and evaluation of the e-Waste inventory to be disposed of and guide our partners to adhere to government compliance and regulations.

Electrical & Electronic

Assets Disposition Securely process IT assets to be retired or reused. We follow strict disposal norms working towards a zero-landfill policy.

Speciality Programs

Can design and implement customized CSR initiatives for organizations.

Data Protection & Destruction

Your privacy is important to us, can guarantee the untraceable destruction of confidential data via on-site or off-site destruction, data-wiping, purging, and shredding of storage media.

Refurbishing & Remarketing

Expand the lifespan of the product by repair them in the clean room environment.

Ease of Doing Business

Conduct ourselves most professionally and take complete accountability for the entire process.

Data Center Decommissioning

Have the experience and expertise to ensure the process is done securely and efficiently while ensuring data security.

E-Waste Recycling & Recovery

Set up Cutting edge technology and Global best practices to convert the waste into secondary raw material.

Transparency

Develop culture of trust and transparency to the client all the stages of the operation.

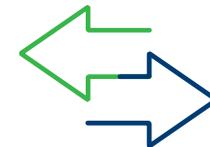

E-Waste Collection & Reverse Logistics

Provide nationwide logistics support to meet an organization's needs and securely transport the e-waste back to our recycling facility while ensuring all necessary documents are in order.

Legal Compliance & Regulatory Affairs Consultancy

Enable our partners to adhere to legal compliance with national laws. Provide all necessary documents and certificates mandated by the government.

End-to-End Solution

Providing one stop services to fulfil all the client's requirements in an efficient manner.

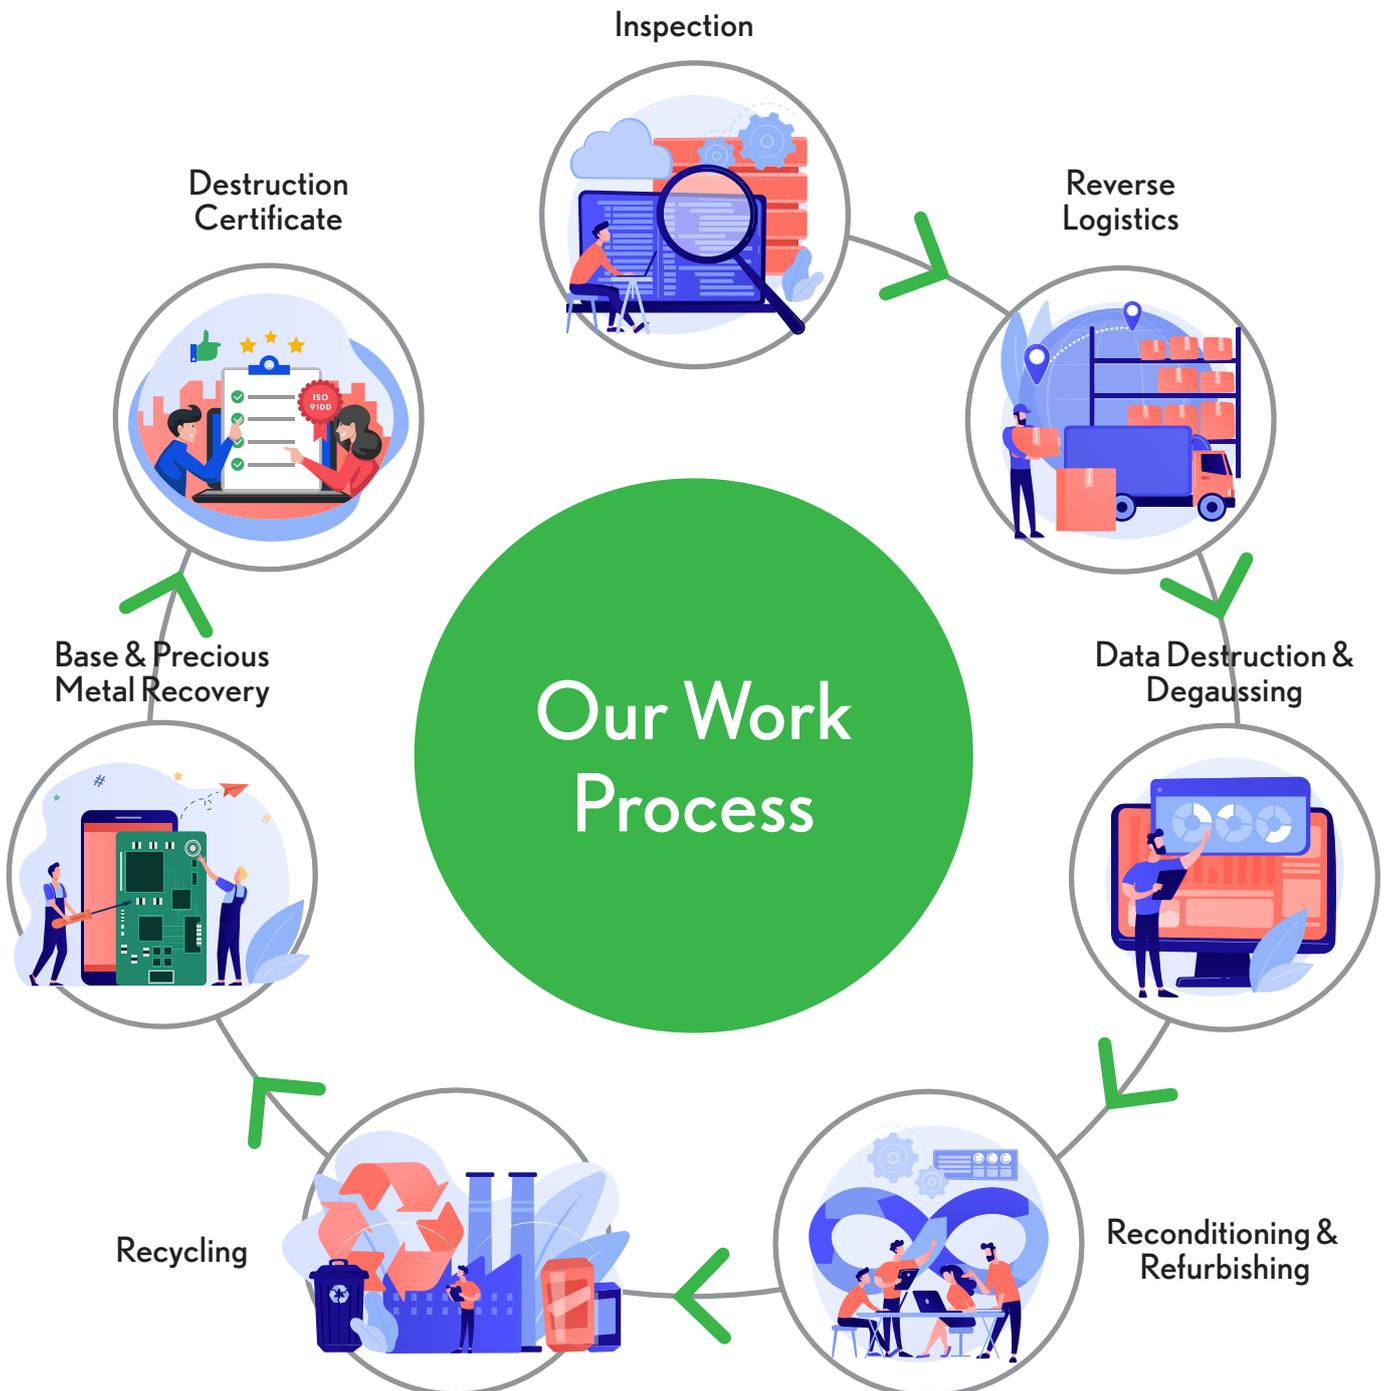

Ethical Recycling

Closed loop recycling facility with environmentally sound processes.

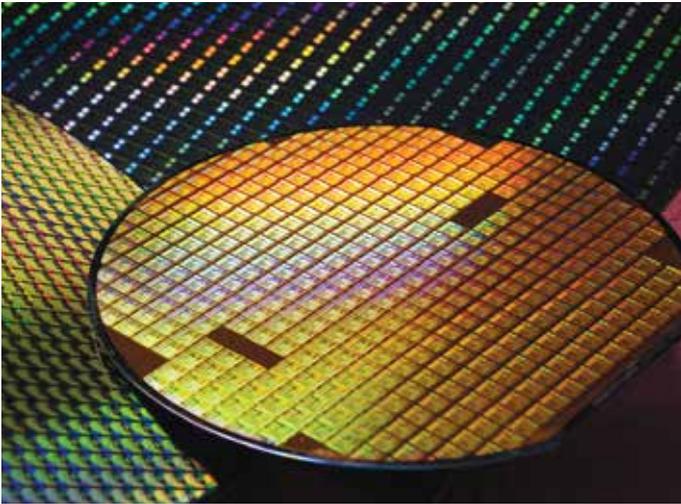

A Mark of Trust

Comply with all the National and International Certifications within e-Waste
Support Producers & Manufacturers to achieve the EPR Collection targets under
e-Waste (Management) Rules 2022

Sustainably Refining Renewable Metals

Transforming Waste into Rich Metals

We provide a comprehensive Green Chemistry Integrated Solution, addressing all aspects of e-Waste and Precious Metals scrap management needs..

Throughout our journey, we have consistently demonstrated our commitment to Sustainability, Innovation, and Responsible Resource Management. Our relentless pursuit of valuable metals not only drives our business but also plays a significant role in preserving the environment and conserving precious resources.

State-of-the-Technology

We specialize in chemically transforming scrap into high valuable precious metals.

A global leader in Metallurgical Recovery & Refining

We offer expert solutions to a diverse range of industries, including

- | e-Waste Management | Semiconductor Industry
- | Jewellery Industry | Pharmaceutical Industry
- | Medical Equipment | Battery Waste Management
- | Home Appliances Waste | Waste Cable & Wires
- | Plastic Waste Management
- | Metal Scrap Management
- | Precious Metals Residues | PGM Catalysts
- | Dental Scrap Management
- | Aero Space & Defence Scraps
- | All other Precious Metals Management

Complete Integrated Solutions

- | R&D Towards new innovative cutting-edge solutions | Insurance Coverage on whole and Product Liability | Accountability, Traceability and High Value Returns | ERP Application to monitor material movement on road | Certified with International Standards | Innovation & Self Customized Technology with 99% efficiency
- | Integrated Analytical Lab with High Precision
- | Precious Metals into Chemical Product Conversion for Electronics Industry | Closed Loop Pollution Control Systems

Leading the Way in Carbon Management Solutions

At Sogo Synergy Pvt Ltd, we are dedicated to not only reducing waste but also actively managing and mitigating greenhouse gas (GHG) emissions. Our comprehensive services include calculating GHG emissions, advising on carbon reduction strategies, and trading carbon credits globally, while collaborating with businesses and government agencies to create sustainable management systems and promote a circular economy.

Strategic Carbon Management Services

Powering the Future Sustainably Renew the Battery

As the demand for lithium-ion (Li-ion) batteries continues to soar, the need for efficient and sustainable recycling solutions becomes increasingly critical.

In today's fast-paced, tech-driven world, lithium-ion batteries power our lives, but their improper disposal poses significant environmental and health challenges. Sogo provides solutions not just by recycling batteries but by revolutionizing the battery economy.

We aim to create a sustainable future by recovering valuable materials from all types of lithium-ion batteries. By converting waste into strategic metals like cobalt, nickel, manganese, and lithium with our cutting-edge technology, we reduce the demand for raw materials. We are committed to minimizing the global environmental footprint by building a circular economy for batteries, reinventing secondary raw materials into the product supply chain.

Circular Economy

Renewed Performance of Refurbished IT Hardware

SOGO Renewed is dedicated to refurbishing electronic devices, including laptops, smartphones, and tablets, to extend their lifecycle and reduce electronic waste. Our circular business model enables us to work towards creating a more sustainable future and add to the circular economy.
